

## Lab 5 – Passive Recon

### Due as per D2L dropbox

#### Scoring Rubric

100	Student successfully completes the assignment as specified for TWO companies
70	Student successfully completes the assignment as specified for ONE company
30	Student successfully is not able to obtain information about the targets and cannot demonstrate all of the avenues attempted
0	Nothing turned in or document is not readable or does not accomplish the lab activities

#### Goal

To perform passive reconnaissance on TWO of three specified target companies.

#### Deliverables

Upload an MS Word DOCX, RTF, or PDF file to D2L with name, course number, assignment and contain appropriate documentation (i.e. items found) to validate your lab.

#### Details

1. Find information about the target companies. You only need to create a recon report on just **TWO** of the **THREE** companies listed on page 2 of this document. To find out which companies you have been assigned to research, go find the GROUP number you have been assigned to in the D2L “Groups” page and then use that group number as your code number to figure out the name of the companies.
2. Collect and collate your information into a word document. Be sure to include pictures, maps, salary data, etc in your document.

#### Restrictions

Under no circumstances are students to do any active reconnaissance (including active probing) of the target companies. Visiting a company’s web site for information is okay; running a port scan isn’t!

#### Background & Resources

- Footprinting & reconnaissance chapter in CHR.
- Google Search features at <http://zer0byte.com/2011/09/20/hand-picked-google-dorks/>

See the instructions above to figure out which companies you have been assigned to research. The format is the name of the company followed by the city or country that the company is located in.
